

Chris Zurbrigg, has developed video tutorials on Python used within Maya. His lessons cover both generic Python and key Maya Python commands. I highly recommend you watch these videos and keep the link for further study.

Here is link to Chris's home page: <http://zurbrigg.com/>

Note that in his tutorials, Chris uses a Maya plugin script editor, Charcoal, which he developed. You can still enter Python commands in Maya's default script editor. You can also use Idle outside of Maya as long as you aren't using Maya's Python module, maya.cmds.
